

PREL-UNIT INSULATING GLASS

Prel-Unit insulating glass make a significant impact on a building's energy consumption. This glass helps keep occupants comfortable, counteracting heat increase in the summer and limiting heat loss in the winter.

VALIDATED ECO-DECLARATION

PRODUCT SPECIFICATIONS

Prel-Unit

Final manufacturing location
Montreal, QC H1B 5X2
Rivière-du-Loup, QC G5R 2M9
CANADA

Composition
Glass, laminated glass, interlayer, sealant
silicone, sealant PIB and desiccant.

ATTRIBUTES

Recycled content
Pre-consumer: 0.2%
Post-consumer: 0.1%

Sourcing of raw materials
Data collection from suppliers has been
conducted for the products components aligned
with each specific environmental analysis.

CERTIFICATIONS AND CONFORMITIES

Prelco is a specialist in the manufacturing of complex and innovative glass solutions enabling us to meet our customers requirements in the architectural, transportation and recreational boating markets. Prelco relies on its expertise of more than 65 years in the business, in the quality of its highly skilled workforce and on its high-tech production equipment.

ENVIRONMENTAL DATA SHEET

PREL-UNIT INSULATING GLASS

PRODUCT CONTRIBUTION SUMMARY

LEED® v4 requirements for Building Design + Construction (BD+C)

New Construction, Core and Shell, Schools, Retail, Data Centers, Warehouse and Distribution Centers, Hospitality and Healthcare.

LEED® v4 requirements for Interior Design + Construction (ID+C)

Commercial Interiors, Retail and Hospitality.

MATERIALS AND RESOURCES		PRODUCT CONTRIBUTIONS	
MR	Building Product Disclosure and Optimization – Environmental Product Declaration (EPD) Option 1: Environmental Product Declaration (1 point) The product contributes to this credit due to the availability of a product specific EPD (Type III) and are valued as 1 whole product out of the 20 needed for the purposes of credit achievement.	Will contribute once the EPD is published	ENVIRONMENTAL IMPACTS Product-specific (EPD) Type III Compliant to ISO 14025:2006
MR	Building Product Disclosure and Optimization – Sourcing of Raw Materials Option 2: Leadership extraction practices (1 point) May also contribute to the location valuation factor if the product is sourced (extracted, manufactured, purchased) within 160 km of the project site.	Contribute	ATTRIBUTES Recycled Content Pre-consumer (0.2%) Post-consumer (0.1%)
MR	Building Product Disclosure and Optimization – Material Ingredients Option 1: Material ingredients reporting (1 point) The product contributes to this credit due to the availability of Health Product Declarations®. They are valued as 1 whole product out of the 20 needed for the purposes of credit achievement.	Contribute	INGREDIENTS AND EMISSIONS HPD® version 2.2 Health Product Declaration®
INDOOR ENVIRONMENTAL QUALITY		PRODUCT CONTRIBUTIONS	
EQ	Low-Emitting Materials Option 1: Product category calculation (1-3 points) For the product category, walls, thermal and acoustical insulation, 100% of all products must meet the requirements.	-	INGREDIENTS AND EMISSIONS Glass is excluded from the scope of this credit. Moreover, glass is an inherently non-emitting source.
EQ	Daylight Design to maximize daylight (1-3 points) Consider how best to allocate interior space to ensure that daylight is available in all regularly occupied spaces. Enclosure design and furniture selection will affect daylight penetration. Possible design strategies include the following: Use transparent partitions or interior glazing to provide daylight to enclosed spaces. Unlike the BD+C rating system, ID+C rating system includes any permanent interior obstructions as well as moveable furniture and partitions.	Contribute	TECHNICAL PERFORMANCES Within an assembly, Prel-Unit Glass may contribute to this credit if design choices are coherent with the credit.
PILOT CREDIT		PRODUCT CONTRIBUTIONS	
PC	Pilot Credit 55- Bird Collision Deterrence (1 point) Reduce bird injury and mortality from in-flight collisions with buildings.	Contribute	Within an assembly, Prel-Unit Glass with bird-safe design may contribute to this pilot credit.

It is important to consider that the total amount of possible points reflects the number of achievable points in each credit category. The product itself cannot achieve this score, as defined above, but is considered as a beneficial element in order to achieve LEED® credits.

The data included in this Environmental Data Sheet has been provided by the client and the suppliers, who are responsible for its veracity and its integrity. Vertima follows a rigorous protocol, including a desktop audit of the factory data, also an audit of the manufacturer's supply chain documentation, the analysis and validation of all supporting documents. However, Vertima cannot be held responsible for false or misleading information that may cause any loss or damage suffered, caused in all or in part, by errors and omissions relative to the collection, compilation and/or interpretation of data.
